

Simcoe Community Services is always looking for qualified family home providers.

### **Family Home Provider**

The Family Home Program offers a supportive accommodation option for children and adults who have an intellectual disability who, for various reasons, are unable to live with their natural families but wish to continue living as an integral part of an alternate family setting. Family Home Providers support individuals to live fully as family members and as citizens of the community. A per diem is provided to Family Home Providers to assist with room and board costs.

Individual and family assessments are completed for interested applicants by Family Home Program social workers in order to identify individual and family needs, determine suitability and facilitate appropriate matches. Ongoing case management and support is provided to the individual child/adult, the Family Home Providers and the natural family.

For more information, please contact 726-9082 ext 239.
